

EDUCATION

Degree	Institute/Board	CGPA/Percentage	Year
Bachelor of Technology	Indian Institute of Technology, Dhanbad	7.57/10	2021–2025
Senior Secondary	Rajasthan Board of Secondary Education	83.80%	2020
Secondary	Central Board of Secondary Education	84.40%	2018

WORK EXPERIENCE

Barclays (India) <i>Technology Developer</i>	AUG 2025 – PRESENT <i>Pune, India</i>
- Built Java Spring Boot microservices and REST APIs for a Payments Migration Dashboard, driving the enterprise transition from legacy SMS messaging to the high-throughput IMI-MT framework for global SWIFT payment processing. - Modeled complex payment-routing entities (BICs, Logical Terminals, HOPS) to enable real-time visualization and tracking of end-to-end transaction flows across Back Office systems. - Implemented REST APIs with JWT authentication and Maker-Checker workflows using a TDD approach with H2 in-memory testing, then migrated to Oracle DB with optimized indexing for production scale.	
Barclays (United Kingdom) <i>Technology Developer Intern</i>	JUN 2024 – AUG 2024 <i>Northampton, United Kingdom</i>

- Developed Java microservices for fraud strategy and analytics, boosting unit test coverage by 10% and testing efficiency by 15% to strengthen risk management workflows.
- Streamlined CI/CD automation and infrastructure deployments using Docker, Kubernetes, Jenkins, and OpenShift.

PROJECTS

- Concurrent Restaurant Simulation** | PROF. HARI OM

Technologies: C, POSIX Processes, Shared Memory, Semaphores, Mutexes

Developed a concurrent simulation where independent processes (customers, waiters, chefs) synchronize through shared memory and POSIX semaphores, ensuring correct execution under concurrent workloads without deadlocks.

GitHub
- Convocation Portal** | PROF. SAURABH SHRIVASTAVA

Technologies: React.js (Next.js), Laravel, MySQL, REST APIs, MVC Architecture

Led development of IIT (ISM)'s Convocation Portal, streamlining operations for 5,000+ students and cutting processing time by 40%; designed scalable REST APIs and optimized MySQL queries, improving backend data retrieval by 30%.

GitHub
- MedicoBert** | PROF. SOUMEN BAG

Technologies: Python, Flask, Google Cloud Vision API, BioBERT, LLaMA3, OCR

Built an intelligent pipeline to extract structured medical information from handwritten prescriptions using OCR, LLaMA3, and fine-tuned BioBERT, centralizing patient-indexed records for efficient retrieval.

GitHub

TECHNICAL SKILLS

- Languages:** Java (17/21), C++, C, Python, Kotlin.
- Backend & Cloud:** Spring Boot, Microservices, REST APIs, Docker, Kubernetes, GCP.
- Databases & Testing:** PostgreSQL, OracleDB, MySQL, Redis, jOOQ, JUnit, TDD Methodologies.
- Tools:** Git, Jenkins, Linux, OpenShift, Jira.

ACHIEVEMENTS

- Secured **top 1K position** out of 60K teams in Xiaomi Ode-2-Code 2.0, demonstrating advanced algorithmic problem-solving.
- Secured **top 1K position** out of 400K teams in Flipkart Grid 5.0 SDE track, focusing on scalable engineering solutions.
- Achieved **AIR-707 in JEE-Mains** (top 0.1% nationally), highlighting an exceptional mathematical foundation.
- Solved **500+ algorithms** (specializing in Graph Theory & Disjoint Set Union) across major coding platforms.

MISCELLANEOUS

- Organiser:** Concetto – Annual Tech Fest of IIT Dhanbad.

2023–2024
- Position of Responsibility:** Student Internship Representative of CSE.

2023–2024
- Club Member:** Data and Software Technology Club — Android Division — Tech Society of IIT Dhanbad.

2022–2025
